I didn't edit my intro reel. *Claude did.*

Every cut, every caption, every sound. Free tools, one script. Here's the stack.

Week 1 · 1:51

SWIPE →

WHAT ACTUALLY HAPPENED

No timeline. *Just code.*

Claude Code wrote the edit as a script. It read my transcript, cut the takes, built every graphic as a small web page, rendered it frame by frame and mixed the sound.

My job: film it on my phone, then give feedback in plain words.

12	1:51	-14
drafts	final length	LUFS loudness

STEP 1 · TRANSCRIBE

Every word gets *a time.*

01

faster-whisper (free, MIT) turns my clips into text, with a start and end time for every single word.

intro_words.json · the real file

```
{"t": 0.00, "e": 0.22, "x": "Hey,"}
{"t": 0.74, "e": 0.86, "x": "I'm"}
{"t": 0.86, "e": 1.18, "x": "Rish,"}  <- misheard
{"t": 1.40, "e": 1.52, "x": "I'm"}
{"t": 1.52, "e": 2.00, "x": "27,"}
```

Whisper heard "Rish". One line of feedback, and every caption says **Vish**.

STEP 2 · CUT

02

Cuts land *between* words.

Claude keeps my best take of each line, drops the restarts and snaps every cut to the edge of a word. One steady speed, no jump cuts.

week1.py · the cut list

```
# line, clip, keep (seconds), fix the transcript
("n1", "IMG_1597", [(0.0, 1.3)], {"Rish,": "Vish,"})
("h2", "IMG_1578", [(2.8, 4.1)], {})
("h3", "IMG_1578", [(4.25, 7.3)], {"to.": "too."})
```

STEP 3 · STORYBOARD

03

Every line gets a picture that *matches.*

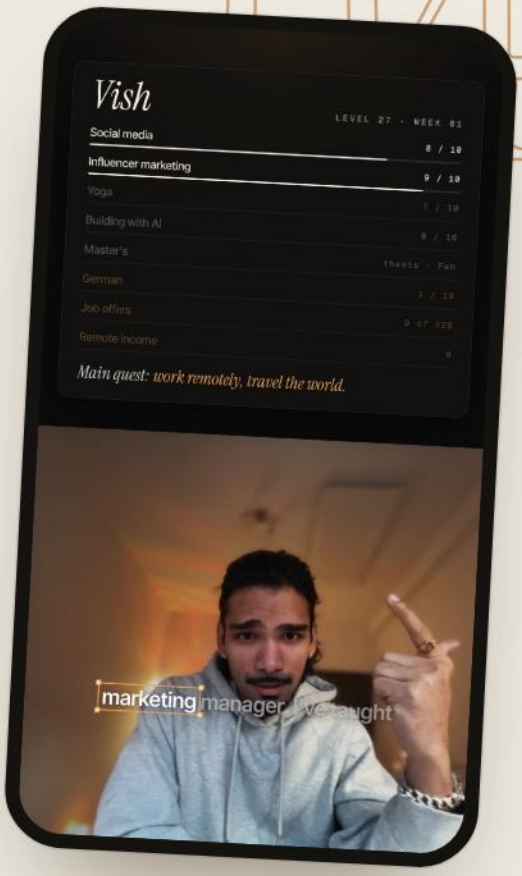

"No job." "Booked a flight." "the 40K debt"

STEP 4 · GRAPHICS

Captions and stickers are *web pages.*

Claude writes each graphic in HTML, Playwright renders it frame by frame, FFmpeg lays it over the video.

```
the 40K counter cue

{"type": "counter",
 "digits": "40", "suffix": "K",
 "roll": 0.42, "stagger": 0.12}
```

STEP 5 · SOUND

05

A sound for every visual. *Silence* for the big lines.

POP	Each sticker as it lands	rising pitch
TICK	The 40K odometer rolling	24 ticks
THUMP	When the number slams	once
WHOOSH	Into every new layout	peaks on the cut
SILENCE	Right after "220 job rejections"	music off

Free sounds: Kenney (CC0) + a few made in Python. Voice always on top.

STEP 6 · FEEDBACK

12 drafts of *plain English.*

06

ME

Start with "Hey, I'm Vish", then the 40K debt, then the rest as it is.

CLAUDE

Done. New opening, the sound design is untouched. Here's the review copy.

ME

Add more fun travel clips when I say I want to travel the world.

CLAUDE

A 14-second montage, cut on the beat of the song.

SAVE THIS · THE STACK

What I used, and *what it costs.*

faster-whisper	transcript, word times	FREE
FFmpeg	cuts, colour, sound, export	FREE
Playwright	renders the graphics	FREE
RVM	cuts me out for the sticker	FREE
Kenney sounds	pops, clicks, whooshes	FREE
Claude Code	writes and runs the edit	PAID PLAN
ElevenLabs	narrator voice, optional	PAID PLAN

Want the five prompts I *used?*

COMMENT

EDIT

and I'll DM you the free guide:

- ✓ the setup in 3 steps
- ✓ the 5 prompts, copy and paste
- ✓ the fixes for every error I hit

Follow for Week 2 on Thursday: my plan to make money from anywhere.
