

THE MINI GUIDE · NO FLUFF, JUST STEPS

YouTube research *with Claude*

Find what works in your niche, why it works, and
what to make next.

1

STEP 1 • GATHER THE MATERIAL

Collect text Claude can *actually read*

Give Claude text, not links. Copy transcripts with Show transcript, note titles and views, export your own Studio data, and keep it all in one Claude Project.

Research folder

- ☒ Transcripts for 8 to 12 videos
- ☒ Title table with views and dates
- ☐ Studio export as CSV
- ☐ Public comments, names removed

COPY THIS PROMPT

Claude

```
Here is a YouTube link: [link]. Tell me what you can read from it: title, description, transcript, comments, thumbnail. Answer "can read", "cannot read" or "not sure" for each. Do not guess. If you cannot read the transcript, tell me what to paste instead.
```

2

STEP 2 · BREAK DOWN HOOKS

Compare how top *videos* *open*

Paste the first 30 seconds of each transcript. Claude tags the opening move, the promise and the proof offered. You see what your niche does most, and what nobody tries.

Hook breakdown (example)

VIDEO	OPENING MOVE	PROOF?
Channel A	Result first	Yes
Channel B	Question	No
Channel C	Story	Partly

COPY THIS PROMPT

Claude

Use the first 30 seconds of each transcript. Make a table: video label, opening move, promise, proof offered, open question. Paraphrase and quote five words at most. List the 3 most common moves. Say if the sample is too small to show a pattern.

3

STEP 3 • FIND TOPIC GAPS

Spot what is missing in *your niche*

Sort topics into covered well, covered thinly and not covered. Then check demand in the Trends tab in YouTube Studio. A gap can mean nobody wants it, so verify before you film.

Coverage by topic (example)

Topic A		Many
Topic B		Few
Topic C		None

COPY THIS PROMPT

Claude

```
Sort these topics into covered well, covered thinly and not covered. Name the videos behind each claim. Suggest 8 ideas for [audience] and mark each "evidence" or "my guess". Do not invent search volumes. Tell me what to check on YouTube first.
```

4

STEP 4 • MINE THE COMMENTS

Turn comments into *video ideas*

Copy 50 to 150 public comments and remove names and handles. Claude groups them into questions, objections and requests. Objections show you which proof to put on screen.

**COPY THIS PROMPT**

Claude

Group these comments into themes. For each: label, type (question, objection, request, confusion, praise), rough count using "about", one paraphrase. Flag themes under three comments as weak. List the 5 questions to answer in a video. Do not guess who commenters are.

5

STEP 5 · TITLES AND THUMBNAILS

Describe the patterns, never *the faces*

List titles with views and dates, and add the words on each thumbnail. Claude describes wording, length and promise types. Describe only. Never ask it to judge anyone's looks.

● ● ● Title patterns (example)

PATTERN	VIDEOS	NOTE
Number + result	A, C	Short
Question	B	Longer
How-to	D	Common

COPY THIS PROMPT

Claude

```
Describe patterns in these titles: length, numbers, questions, brackets, promise type. Group by pattern with view counts. Say which comparisons are unfair because of channel size or age. For thumbnails, describe only visible words and layout.
```

6

STEP 6 • WRITE THE OUTLINE

Turn research into a *script outline*

Ask for 3 title options, a 20-second hook and 4 to 6 sections, each with proof and what is on screen. Leave placeholders for your own examples. Your experience is what makes the video yours.

Outline checklist

- ☒ 3 title options
- ☒ Hook for the first 20 seconds
- ☒ 4 to 6 sections with proof
- ☐ Comment questions answered
- ☐ Your own example in each section

COPY THIS PROMPT

Claude

```
Using this project's research, outline one video on [topic]
for [audience]: 3 titles, a 20-second hook, 4 to 6 sections
with proof and visuals, and a closing step. Use your own
words. Put [YOUR EXAMPLE] where my experience belongs. Ask
me first if the research is thin.
```

7

STEP 7 • MONTHLY ROUTINE

Make it a *monthly routine*

Keep everything in one Claude Project with standing rules. Each month, add new videos and a fresh Studio export, then compare against last month's brief and pick the next two or three ideas.

● ● ● Claude Project • YouTube research

Project knowledge: transcripts

Project knowledge: title table

Studio export, this month

Last month's one-page brief

COPY THIS PROMPT

Claude

You are my YouTube research assistant for [niche]. Use only this project's material and what I paste. Never claim you watched a video. Paraphrase and quote five words at most. Mark each insight "evidence" or "guess". Describe thumbnails neutrally. Ask when my request is unclear.

Want the *full guide*?

Seven steps, ten copy-paste prompts and the monthly routine, with the setup written out.
