AI careers

Anthropic is putting *\$100M* into one job title.

It's an engineering role. The shape of it is AI Ops.

\$100M - 10,000 engineers

01 · The news

\$100M

to train 10,000 Frontier Deployed Engineers by the end of 2027.

Anthropic launched Claude Frontier Academy on 2 October. The first badges are expected in early 2027.

Source: Anthropic, 2 Oct 2026

02 • Who's in

Big consultancies and banks went first.

Accenture, Bain, Capgemini, Commonwealth Bank of Australia, Deloitte, McKinsey, Morgan Stanley and Novo Nordisk are in the first cohorts. CommBank is sending an initial group of 20 engineers.

What they actually practise

01 Pick the right use case

02 Pass security review

03 Hand it over so people use it

04 Then 12 weeks leading a real rollout at their own company

It's an engineering role. *Here's the overlap.*

ENGINEERS ONLY

- ◆ Writing the code
- ◆ Hands-on software work
- ◆ Nomination to join

MARKETERS ALREADY DO

- ◆ Choosing the problem worth solving
- ◆ Getting sign-off
- ◆ Making people actually use it

05 · My take

That's AI Ops.

I'm not an engineer and won't pretend to be. But right problem, safe rollout and real adoption is the job I'm growing into, and marketers already do half of it.
