Creators x AI

YouTube's AI editor will *add your text hooks* for you

5 Made On YouTube updates worth knowing

auto text hook ↓

01 · Edit by chat

A Gemini editing assistant

Type to **trim speech, sync music, add text hooks and reorder frames** in Shorts and YouTube Create. TechCrunch reports it should arrive early next year.

02 · Shorts series

Seasons and episodes

Creators can group Shorts into seasons and episodes, built for episodic stories and microdramas on mobile and TV. Brands can brief a series, not just one video.

03 · Likeness detection

Protect your face and voice

YouTube is expanding likeness detection to cover creators' **voice and face**. As AI copies get easier to make, this becomes part of every partnership conversation.

04 · Brand deals

Get found by brands on YouTube

YouTube highlighted new ways to get noticed by brands and resources for pitching partnerships. More of the deal process may move onto the platform.

05 · Live auto-dubbing

Streams in other languages

Real-time auto-dubbing for live streams. A live launch or Q&A can reach viewers who don't speak the creator's language.

What I'd do now

01 Add likeness terms to contracts

02 Sketch one Shorts series idea

03 Register for likeness detection

04 Check availability in your market
